This appropriation supports a unique Federal-State partnership as it creates opportunities for self-sustaining economic development and improved quality of life for the roughly 22 million people of Appalachia. Investments made throughout this 13-state region include the nation's only highway system explicitly authorized by Congress to foster economic development, and area development. Under the area development

program, member States recommend projects with a special focus on distressed counties.

Appalachian development highway system.—The Appalachian development highway system (ADHS), including local access roads, is designed to improve the accessibility of Appalachia; to reduce highway transportation costs to and within Appalachia; and to provide the highway transportation facilities necessary to accelerate the overall development of Appalachia. Studies have found that the ADHS to be cost-beneficial, generating significant economic impacts.

Since FY 1999, funding for the ADHS has been provided predominantly from the Highway Trust Fund. The Transportation Equity Act for the 21st Century (TEA21) authorized \$2.25 billion for the construction of the ADHS and local access road projects under Section 201 of the Appalachian Regional Development Act. TEA21 authorizes \$450 million annually to be appropriated out of the Highway Trust Fund for each of fiscal years 1999 through 2003. The ARC exercises programmatic and administrative control over these funds as it did when a direct appropriation was received.

The cumulative status of the system of roads follows:

Development systems miles (Prefinanced miles included) (cumulative):	2000 actual	2001 est.*	2002 est.*
Miles placed under construction	2,483	2,503	2,523

*Includes TEA21 funds.

Area development program.—Area development funds are allocated by formula to each of the 13 member-States. This funding supports projects that promote sustainable regional development, with assistance targeted at the most distressed and underdeveloped counties.

The Appalachian Regional Development Reform Act of 1998 reflects the ARC's prior policy of targeting resources to the region's most distressed counties. Since FY 1999 roughly half of all ARC program funding has supported projects in such counties. These counties represent about one quarter of the region's total and contain roughly 10% of the region's population.

The area development program funds projects which advance the goals and objectives of ARC's strategic plan. This strategic plan commits ARC to achieving five broad goals, each of which is undergirded by several specific objectives. These five goals are: (1) Appalachian residents will have the skills and knowledge necessary to compete in today's global economy; (2) Appalachian communities will have the physical infrastructure necessary for self-sustaining economic development and improved quality of life; (3) the people of Appalachia will have the vision and capacity to mobilize and work together for sustained economic progress and improvement of their communities; (4) Appalachian residents will have access to financial and technical resources to help build dynamic and self-sustaining local economies; and, (5) Appalachian residents will have access to affordable, quality health care. The Commission has taken aggressive steps to ensure that the area development program will make progress on accomplishing these goals, to better target resources to those com-

munities with the greatest needs, and to increase flexibility in project submission.

Each Governor submits for Commission approval an annual strategy statement detailing the areas of emphasis within the Region. All project applications submitted by the Governors to address these priorities, describe the goals and objectives, and projected inputs, outputs, and outcomes. During and after the project implementation cycle, projected outputs and outcomes are compared to actual results.

In addition to the regular allocation of area development funds, ARC also identifies regional problems and opportunities and sets aside resources for special initiatives. The ongoing entrepreneurship initiative seeks to ensure that Appalachian communities have the commitment and resources to help entrepreneurs start and expand local businesses. To date, this initiative has funded 169 projects, providing nearly \$14 million in ARC funds and leveraging over \$13 million in additional funds from other sources. Fifty projects that have been completed report the creation of 249 new businesses, and creation or retention of 587 jobs in the region. It is estimated that the 119 on-going programs will create 486 new businesses and create or retain 3,585 jobs in the region.

The budget for 2002 provides \$56 million for area development.

The approximate project workload follows:

Area development projects	2000 actual	2001 est.	2002 est.
.....	449	475	475

Local development districts and technical assistance programs.—The multi-county local development districts (LDDs) assist local governments throughout Appalachia in planning and working together on a regional basis. LLD funding from the ARC provides a cost-share with member governments, enabling local professional staff to help plan, initiate, and implement projects at the grass roots level. Technical assistance serves to strengthen the state and local governments, LDDs and non-profit organizations in the Region. TEA21 added seven new counties to the Region, for a total of 406. This increased the number of LDDs served from 69 to 71. The Budget provides \$5 million for the LDDs and \$1 million for technical assistance, with the approximate approved workload as follows:

	2000 actual	2001 est.	2002 est.
Planning districts aided	71	71	71
Technical assistance projects	22	24	24

Salaries and expenses.—The Federal Co-Chairman represents the Federal Government on the Commission and leads in the coordination of programs serving the Appalachian Region across the Federal Government. Since 1989, the Office of the Federal Co-Chairman has included an Inspector General.

In this Federal-State partnership, the Federal Government contributes half of the expenses of a professional staff which works with the States and the Federal staff in operating the program. The other half of these non-Federal employee expenses are provided by member States. The budget provides a total of \$4 million for salaries and expenses.

The Architectural and Transportation Barriers Compliance Board (Access Board) was established by section 502 of the Rehabilitation Act of 1973 to ensure compliance with the Architectural Barriers Act of 1968. Since that time, the Access Board has been the only independent Federal agency whose primary mission is accessibility for people with disabilities. The Access Board has responsibility under four major pieces of legislation: the Architectural Barriers Act of 1968 (ABA); the Americans with Disabilities Act of 1990 (ADA); the Tele-

General and special funds—Continued

SALARIES AND EXPENSES—Continued

communications Act of 1996; and section 508 of the Rehabilitation Act.

The Access Board's first major responsibility was to enforce the ABA, ensuring accessibility in facilities built, altered, or leased using certain Federal funds. In fiscal year 2001, the Board will continue to process, investigate, and resolve complaints of noncompliance. The Access Board has a proven record of voluntary, amicable resolution of access issues.

Under the Americans with Disabilities Act (ADA), the Access Board gained responsibility for two major public roles: to develop minimum accessibility guidelines for places of public accommodation, commercial facilities, State and local government facilities, and transportation vehicles and facilities, all of which are covered under the ADA; and to offer training and technical assistance to individuals and organizations throughout the country on removing architectural, transportation and communication barriers.

In pursuing these responsibilities under the ADA, the Board uses citizens' advisory committees, negotiated rule-making, and other communication channels to encourage the public's full participation in the Federal rulemaking process for developing its ADA Accessibility Guidelines (ADAAG). In addition, the Board is working with the building industry toward the development of a single set of minimum accessibility guidelines, using ADAAG as the basis.

Under the Telecommunications Act, the Access Board is charged with developing accessibility guidelines for telecommunications equipment and customer premises equipment, in conjunction with the Federal Communications Commission. The Telecommunications Act requires that such equipment be "designed, developed, and fabricated to be accessible to and usable by individuals with disabilities, if readily achievable."

Section 508 of the Rehabilitation Act of 1973, as amended, requires that when Federal departments or agencies develop, procure, maintain, or use electronic and information technology, they shall ensure that the technology is accessible to people with disabilities, unless an undue burden would be imposed on the department or agency. In the Rehabilitation Act Amendments of 1998 (Title IV of the Workforce Investment Act of 1998) the Board was given the responsibility to develop the standards that electronic and information technology must meet to be accessible to people with disabilities.

Consistent with the Government Performance and Results Act, (GPRA) the Access Board has adopted the following mission statement to guide its programs: *The Board is the catalyst for achieving an accessible America.* This statement recognizes that achieving an accessible America requires bringing together public and private sectors. The Board has established long range goals that aim to bring together public and private sectors for achieving an accessible America. The Board's long-range goals are to:

- Take a leadership role in the development of codes and standards for accessibility
- Work in partnership with Federal agencies and others to make the Federal government a model of compliance with accessibility standards
- Be known as the leading source of information about accessibility and disseminate that information to our customers in effective ways

In FY 2002, the Board will continue to work on its major goal of taking a leadership role in the development of codes and standards for accessibility. The board plans to complete work on guidelines for outdoor developed areas, and publish notices of proposed rulemaking on public rights-of-ways and passenger vessels. Following its second goal, the Board will continue work with other Federal agencies to identify and

publicize best practices in compliance with the Architectural Barriers Act. In line with its third goal, the Board will be in position to make better use of its web pages to disseminate information to the public. Finally, the Board will continue to use its website to efficiently distribute information about compliance with section 508.

The Committee for Purchase From People Who Are Blind or Severely Disabled administers the Javits-Wagner-O'Day (JWOD) Act of 1971, as amended. Its primary objective is to use the purchasing power of the Federal Government to provide people who are blind or have other severe disabilities with employment and training that will develop and improve job skills as well as prepare them for employment options outside the JWOD Program. In 2002, the Committee's goal is to employ approximately 43,000 people who are blind or have other severe disabilities in 750 producing nonprofit agencies. The Committee's duties include promoting the program; determining which products and services are suitable for Government procurement from qualified nonprofit agencies serving people who are blind or have other severe disabilities; maintaining a procurement list of such products and services; determining the fair market price for products and services on the procurement list; and making rules and regulations necessary to carry out the purposes of the Act. In 2002 the Committee's goal is to have sales of \$1.7 billion.

The Committee staff's responsibilities include promoting and assessing the overall programs; supervising the selection and assignment of new products and services; assisting in establishing prices; reviewing and adjusting these prices; verifying the qualifications of nonprofit agencies; and monitoring their performance. The increased resources proposed

for 2002 would enable the Committee to continue its marketing efforts, which are essential to protecting jobs for people with disabilities involved in supplying commercial-type products such as office supplies to Federal customers under the JWOD Program. The education functions to be supported by these funds would focus on informing Federal purchase card holders about JWOD products and working with private sector distributors of those products, including e-commerce vendors.

The Commodity Futures Trading Commission (CFTC) administers the Commodity Exchange Act of 1936, as amended. The purpose of the CFTC is to further the economic utility of the futures markets by encouraging their efficiency, assuring their integrity, and protecting participants against abusive trade practices, fraud, and deceit. The object of commodity futures trading regulation is to enable the markets to better serve their designated functions of providing a price discovery mechanism and a means of offsetting price risk. By properly serving these functions, the futures markets serve the public interest by contributing toward better planning, more efficient distribution and consumption, and more economical marketing. The commodity futures and options markets represent one of America's most innovative and competitive contributions to the international financial services industry.

The Administration proposes additional dollar resources above the fiscal year 2001 level for the Commission. These resources contribute to the Commission's ability to investigate and detect fraud and abuse and ensure the continued integrity of the commodities markets. In addition, these funds would provide the Commission with enforcement and surveillance resources to respond to the continued growth and use of complex trading and derivative instruments.

Market surveillance, analysis and research.—Responsibilities under this program include daily surveillance of the market activity of large individual traders and fundamental economic market factors to insure orderly markets. Contract terms and conditions are reviewed to insure conformity with current cash marketing conditions and adequate deliverable supplies. This program also systematically investigates the functioning of markets and market users and develops better tools to assist in detecting and preventing price distortions.

Enforcement.—The enforcement program is responsible for detecting, investigating, and litigating violations of the Act or regulations. These violations may include actual and attempted market manipulations, cheating and defrauding customers, and abusive trading practices such as fictitious trading, wash trading, and pre-arranged trading. This program may seek remedies through the administrative process or by injunctive actions in the Federal Courts.

Trading and markets.—This program is designed to protect customer funds, prevent and detect financial, sales practice and trading abuses, and to assure the financial integrity and fitness of firms holding customer funds. In order to assure compliance with statutory requirements, this program monitors compliance activities of designated contract markets and the National Futures Association, conducts audits and reviews of registrants, and reviews self-regulatory organizations' rules and proposed rule changes. The program also develops regulations pursuant to statutory requirements and coordinates

General programming.—The Corporation for Public Broadcasting provides grants to qualified public television and radio stations to be used at their discretion for purposes related to program production or acquisition and general operations. The Corporation also supports the production and acquisition of radio and television programs for national distribution. In addition, the Corporation assists in the financing of several system-wide activities, including national satellite interconnection services and the payment of music royalty fees, and provides limited technical assistance, research, and planning services to improve system-wide capacity and performance. By custom, the appropriation for the Corporation has been enacted two years in advance. For 2002 and 2003, appro-

priations of \$350 million and \$365 million were enacted in the 2000 and 2001 appropriations acts, respectively.

Consistent with the Administration's policy on limiting the use of advance appropriations, the Administration is not proposing advance appropriations for 2004. Rather, the Administration proposes that the Corporation receive appropriations like other programs that receive Federal assistance. Therefore, a 2004 funding request for the Corporation will be proposed in the FY 2004 President's Budget.

Public broadcasting assists in the educational and cultural development of our Nation. Funding for the Corporation facilitates the provision of universally available educational, non-commercial public telecommunications services that meet the needs of local communities across the country.

Digital transition.—In April 1997, the Federal Communications Commission issued regulations requiring broadcasters to transition from analog to digital broadcasting. Public broadcasters must convert to digital by May 1, 2003. Funds made available to the Corporation will facilitate public broadcasters' transition to digital broadcasting. The Corporation's funding will be used in coordination with funds made available to the Commerce Department. Commerce Department funding will be targeted for digital transmission equipment, while the Corporation's funding will support necessary investments related to digital program production, development and distribution associated with the transition of public broadcasters to digital broadcasting.

The Veterans Judicial Review Act, 38 U.S.C. §§ 7251-7292 (1988) established the United States Court of Veterans Appeals (renamed United States Court of Appeals for Veterans Claims as of March 1, 1999, Public Law 105-368) under Article I of the United States Constitution. The Court is empowered to review decisions of the Board of Veterans' Appeals and may affirm, modify, revise, or remand a decision of the Board of Veterans' Appeals as it deems appropriate. The type of review performed by the Court is similar to that which is performed in Article III courts under the Administrative Procedure Act, title 5 U.S.C. §§ 551 et seq. In actions before it, the Court has the authority to decide all relevant questions of law, to interpret constitutional, statutory, and regulatory provisions, and to determine the meaning or applicability of the terms of an action by the Secretary of the Department of Veterans Affairs. The Court, being created by an act of Congress, may issue all writs necessary or appropriate in aid of its jurisdiction, 28 U.S.C. § 1651.

The Court is empowered to: compel actions of the Secretary that are found to have been unlawfully withheld or unreasonably delayed; and set aside decisions, findings, conclusions, rules, and regulations issued or adopted by the Secretary, the Board of Veterans' Appeals, or the Chairman of the Board that are found to be arbitrary or capricious. The Court may also set aside decisions which are abuse of discretion or otherwise not in accordance with the law, contrary to constitutional right, in excess of statutory jurisdiction or authority, or without observance of the procedures required by law. In cases involving benefits under the laws administered by the Department, the Court may hold unlawful or set aside findings of material facts if the findings are clearly erroneous.

The Court's principal office location is Washington, D.C.; however, it is a national court, empowered to sit anywhere in the United States.

Pro bono program.—The Legal Services Corporation administers a grant program to provide pro bono representation and legal assistance to claimants who file appeals with the Court. Congress funds the grant program through the Court's appropriation. To maintain impartiality, the Court does not administer the program or comment on the program's budget estimate.

Practice registration fees.—38 U.S.C. § 7285 established a fund, which receives no appropriations, that will be used by the U.S. Court of Appeals for Veterans Claims to employ independent counsel to pursue disciplinary matters involving practitioners and to defray costs for the implementation of the standards of practice before the Court.

The National Capital Revitalization and Self-Government Improvement Act established the Court Services and Offender Supervision Agency for the District of Columbia as an independent Federal agency, which has assumed the District of Columbia pretrial services, adult probation, and parole supervision functions. The mission of the Agency, including the D.C. Pretrial Services Agency, is to increase public safety, prevent crime, reduce recidivism and support the fair administration of justice in close collaboration with the community. The D.C. Public Defender Service provides legal representation services within the District of Columbia, and transmits its budget with that of the Agency, yet operates as an independent District of Columbia agency, as required by law.

The Agency's budget supports the Community Supervision Program, the Pretrial Services Agency, and the Public Defender Service.

Community Supervision Program.—This activity provides supervision of adult offenders on probation, parole or supervised release, consistent with a proven crime prevention strategy that integrates supervision, routine drug testing, treatment, and graduated sanctions. For 2002, \$21,736,000 is requested to improve the re-entry process for transitioning parolees from prison into the community, provide immediate and graduated sanctions to offenders who violate conditions of their release, provide substance abuse and mental health treatment and assessment services for offenders under supervision, increase drug testing collection capabilities in supervision field units, and improve and support the automated case management system. Of this amount, \$13,015,000 is requested for the renovation and repair of a residential Re-Entry and Sanctions Center.

Pretrial Services Agency.—This activity assists the trial and appellate levels of both the Federal and local courts in determining eligibility for pretrial release by providing background information on all arrestees. The Pretrial Services Agency is further responsible for supervising conditions of release and reporting on compliance to the court. For 2002, \$3,350,000 is requested to reduce pretrial defendant general supervision caseloads, provided additional substance abuse and mental health treatment and assessment services for pretrial defendants under supervision, and to improve and support the automated case management system.

Public Defender Service.—This activity provides legal representation to defendants and provides support in the form of training, consultation and legal reference services to members of the local bar appointed as counsel in criminal, juvenile, and mental health cases involving indigent individuals. For 2002, \$1,019,000 is requested to provide legal services and assistance to individuals under community-based criminal justice supervision (probation, parole, pretrial release) in order to reduce recidivism and reduce the number of people subject to revocation of release and re-incarceration.

In 2002, the Court Services and Offender Supervision Agency will continue to work closely with all elements of the District of Columbia and Federal criminal justice, courts, corrections, and rehabilitation systems to improve offender supervision and court services programs, policy, and practice.

The Defense Nuclear Facilities Safety Board, authorized by Public Law 100-456, is responsible for evaluating the content and implementation of the standards relating to the design, construction, operation, and decommissioning of defense nuclear facilities of the Department of Energy (DOE) (as defined in Public Law 100-456). The Board also reviews the design of new DOE defense nuclear facilities, and periodically reviews and monitors construction of such facilities to ensure adequate protection of public and worker health and safety. In addition, the National Defense Authorization Act for 1992 and 1993 (Public Law 102-190) expanded the Board's jurisdiction to include facilities and activities involved with the assembly, disassembly, and testing of nuclear weapons. The Board is also responsible for investigating any event or practice at a defense nuclear facility which has or may adversely affect public health and safety. The Board makes specific recommendations to the Secretary of Energy on measures that should be adopted to ensure that both public and employee health and safety are adequately protected.

Under the National Capital Revitalization and Self-Government Improvement Act of 1997, the Federal Government is required to finance the District of Columbia Courts beginning in 1998. This Federal payment to the District of Columbia Courts funds the operations of the District of Columbia Court of Appeals, Superior Court and the Court System. Beginning in 1999, the Federal Government also provides funds for capital improvements. Beginning in 2000, funding for Defender Services in the District of Columbia Courts is provided through a separate account.

By law, the annual budget includes estimates of the expenditures for the operations of the District of Columbia Courts prepared by the Joint Committee on Judicial Administration in the District of Columbia and the President's recommendation for funding District Courts operations. The President's recommended level of \$111 million includes: \$105 million for District of Columbia Court of Appeals, Superior Court of the District of Columbia and the District of Columbia Court System operations; and \$6 million for capital improvements for District courthouse facilities. Under a separate transmittal to Congress, the District Courts are requesting \$152 million; \$106 million for operations and \$46 million for capital improvements.

The District of Columbia Courts appoint and compensate attorneys to represent persons who are financially unable to obtain such representation under three Defender Services programs: the Criminal Justice Act (CJA) program provides court-appointed attorneys to indigent persons who are charged with criminal offenses; the Counsel for Child Abuse and Neglect (CCAN) program provides court-appointed attorneys for family proceedings in which child neglect is alleged, or where the termination of the parent-child relationship is under consideration and the parent, guardian, or custodian of the child is indigent; the Guardianship program provides

for the representation and protection of mentally incapacitated individuals and minors whose parents are deceased. In addition to legal representation, these programs provide indigent persons with services such as: transcripts of court proceedings; expert witness testimony; foreign and sign language interpretation; and investigations and genetic testing. The President's recommended funding level for Defender Services is \$34 million. Under a separate transmittal to Congress, the Courts are requesting \$40 million for Defender Services.

The National Capital Revitalization and Self-Government Improvement Act of 1997, as amended (the Act), requires

the Secretary of the Treasury to make payments at the end of each fiscal year, beginning in 1998, from the General Fund of the Treasury into the District of Columbia Judicial Retirement and Survivors Annuity Fund (Judicial Fund). Annual payments consist of amounts necessary to amortize: the original unfunded liability over 30 years; the net experience gain or loss over 10 years; any other changes in actuarial liability over 20 years; and amounts necessary to fund the normal cost and covered administrative expenses for the year. This account receives the annual payments from the General Fund and immediately transfers those amounts to the Judicial Fund through an expenditure transfer.

The National Capital Revitalization and Self-Government Improvement Act requires that the adult felon population of the District of Columbia be transferred to the Federal Prison System over the next several years. To assist in this transition, the Act established a Corrections Trustee to provide financial oversight of, and assistance to, the District of Columbia Department of Corrections during this period. The Corrections Trustee also provides funding to the D.C. Department of Corrections associated with the prisoner population that will eventually be transferred to the Federal Prison System. The current D.C. felon inmate population is approximately 4,800, in addition to 3,200 inmates who have already been transferred permanently to the Federal Prison System. The remaining inmates will be transferred to the Federal Prison System when the D.C. prison facilities at Lorton, Virginia, are closed or by December 31, 2001, whichever is earlier.

In 2002, the Corrections Trustee will continue to work with the D.C. Department of Corrections to close the last remaining facility at the Lorton Correctional Complex. By no later than December 31, 2001, all D.C. adult felon inmates will have been transferred to the Federal Bureau of Prisons. After the final transfer of inmates, the remaining property at the Lorton Correctional Complex will be vacated and prepared for transfer to Fairfax County. Included in preparatory work will be the closing of the sewerage treatment plant and the removal of underground storage tanks. Lorton-based functions that will continue will be relocated from Lorton to a new location in the District of Columbia.

In an effort to assist the District of Columbia Criminal Justice System, the Corrections Trustee, in consultation with the D.C. Criminal Justice Coordinating Council, will continue to fund an initiative, not to exceed \$1 million, to review improvements in inmate case processing in the District's criminal justice system.

It is anticipated that 2002 will be the final year of operation for the D.C. Corrections Trustee as all responsibility for D.C. felons will have been transferred to the Federal Bureau of Prisons on or before December 31, 2001.

The National Capital Revitalization and Self-Government Improvement Act of 1997, as amended (the Act), established

the Federal Supplemental District of Columbia Pension Fund (Supplemental Fund) to pay retirement benefits for District of Columbia law enforcement officers, firefighters, and teachers after the District of Columbia Federal Pension Liability Trust Fund has been depleted, and to pay any necessary expenses to administer the fund. The Supplemental Fund consists of: amounts deposited into the fund; any amount appropriated to the fund; and any income earned from investment of the assets in public debt securities. The Act requires the Secretary of the Treasury to make payments at the end of each fiscal year, beginning in 1998, from the General Fund of the Treasury into the Supplemental Fund. Annual payments consist of amounts necessary to amortize: the original unfunded liability over 30 years; the net experience gain or loss over 10 years; and any other changes in actuarial liability over 20 years, and, amounts necessary to fund covered administrative expenses for the year.

DCWASA) is paid for water and sanitary sewer services furnished to the Government of the United States or any department, agency, or independent establishment thereof.” Each agency was to pay 25 percent of its estimated yearly bill each quarter by depositing its payment into this account. Even if all agencies did not submit payment on time, Treasury was directed to pay the Government-wide bill, making up the difference from a permanent, indefinite appropriation account, which was then to be reimbursed by the appropriate agencies.

The 2001 Consolidated Appropriations Act amended this system by repealing the permanent, indefinite appropriation account, by directing Treasury to draw down agency funds for payment of water and sewer bills, by requiring agency Inspectors General to analyze how promptly the user agency makes its payment, and by making these amendments retroactive to 1990.

GENERAL PROVISIONS

GENERAL PROVISIONS

SEC. 101. Whenever in this Act, an amount is specified within an appropriation for particular purposes or objects of expenditure, such amount, unless otherwise specified, shall be considered as the maximum amount that may be expended for said purpose or object rather than an amount set apart exclusively therefor.

SEC. 102. Appropriations in this Act shall be available for expenses of travel and for the payment of dues of organizations concerned with the work of the District of Columbia government, when authorized by the Mayor: *Provided*, That in the case of the Council of the District of Columbia, funds may be expended with the authorization of the chair of the Council.

SEC. 103. There are appropriated from the applicable funds of the District of Columbia such sums as may be necessary for making refunds and for the payment of judgments that have been entered against the District of Columbia government: *Provided*, That nothing contained in this section shall be construed as modifying or affecting the provisions of section 11(c)(3) of title XII of the District of Columbia Income and Franchise Tax Act of 1947 (70 Stat. 78; Public Law 84-460; D.C. Code, sec. 47-1812.11(c)(3)).

[SEC. 104. (a) REQUIRING MAYOR TO MAINTAIN INDEX.—Effective with respect to fiscal year 2001 and each succeeding fiscal year, the Mayor of the District of Columbia shall maintain an index of all employment personal services and consulting contracts in effect on behalf of the District government, and shall include in the index specific information on any severance clause in effect under any such contract.

(b) PUBLIC INSPECTION.—The index maintained under subsection (a) shall be kept available for public inspection during regular business hours.

(c) CONTRACTS EXEMPTED.—Subsection (a) shall not apply with respect to any collective bargaining agreement or any contract entered into pursuant to such a collective bargaining agreement.

SEC. [106] 105. No funds appropriated in this Act for the District of Columbia government for the operation of educational institutions, the compensation of personnel, or for other educational purposes may be used to permit, encourage, facilitate, or further partisan political activities. Nothing herein is intended to prohibit the availability of school buildings for the use of any community or partisan political group during non-school hours.

SEC. [107] 106. None of the funds appropriated in this Act shall be made available to pay the salary of any employee of the District of Columbia government whose name, title, grade, salary, past work experience, and salary history are not available for inspection by the House and Senate Committees on Appropriations, the House Committee on Government Reform, the Senate Committee on Governmental Affairs, and the Council of the District of Columbia, or their duly authorized representative.

SEC. [108] 107. There are appropriated from the applicable funds of the District of Columbia such sums as may be necessary for making payments authorized by the District of Columbia Revenue Recovery Act of 1977 (D.C. Law 2-20; D.C. Code, sec. 47-421 et seq.).

SEC. [109] 108. No part of this appropriation shall be used for publicity or propaganda purposes or implementation of any policy including boycott designed to support or defeat legislation pending before Congress or any State legislature.

At the start of the fiscal year, the Mayor shall develop an annual plan, by quarter and by project, for capital outlay borrowings: *Provided*, That within a reasonable time after the close of each quarter, the Mayor shall report to the Council of the District of Columbia and the Congress the actual borrowings and spending progress compared with projections.

SEC. [111] 110. (a) None of the funds provided under this Act to the agencies funded by this Act, both Federal and District government agencies, that remain available for obligation or expenditure in fiscal year [2001] 2002, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure for an agency through a reprogramming of funds which: (1) creates new programs; (2) eliminates a program, project, or responsibility center; (3) establishes or changes allocations specifically denied, limited or increased by Congress in this Act; (4) increases funds or personnel by any means for any program, project, or responsibility center for which funds have been denied or restricted; (5) reestablishes through reprogramming any program or project previously deferred through reprogramming; (6) augments existing programs, projects, or responsibility centers through a reprogramming of funds in excess of \$1,000,000 or 10 percent, whichever is less; or (7) increases by 20 percent or more personnel assigned to a specific program, project or responsibility center; unless the Committees on Appropriations of both the Senate and House of Representatives are notified in writing 30 days in advance of any reprogramming as set forth in this section.

SEC. [112] 111. Consistent with the provisions of 31 U.S.C. 1301(a), appropriations under this Act shall be applied only to the objects for which the appropriations were made except as otherwise provided by law.

SEC. [113] 112. Notwithstanding any other provisions of law, the provisions of the District of Columbia Government Comprehensive Merit Personnel Act of 1978 (D.C. Law 2-139; D.C. The Equal Employment Opportunity Commission (EEOC) is the Federal agency responsible for enforcement of: the Age Discrimination in Employment Act of 1967; title VII of the Civil Rights Act of 1964, as amended; the Equal Pay Act of 1963; in the Federal sector only, section 501 of the Rehabilitation Act of 1963; the Americans with Disabilities Act of 1990; and the Civil Rights Act of 1991. These acts prohibit employment discrimination based on race, sex, religion, national origin, age, or handicap status. The EEOC is also responsible for carrying out Executive Order 12067, which promotes coordination and minimizes conflict and duplication among Federal agencies that administer statutes or regulations involving employment discrimination.

The EEOC's budget supports three activities:
Executive direction and support.—This activity provides for the direction and coordination of the Commission's programs. It also provides administrative and management support services for the agency. EEOC will continue to enhance support to front-line staff to improve the efficiency and effectiveness of service to the public during 2002.

Enforcement.—This activity resolves charges of employment discrimination filed with the Commission and pursues litigation to enforce compliance with Title VII, the Equal Pay Act, the Age Discrimination in Employment Act, the Americans with Disabilities Act, and the Civil Rights Act of 1991. In 2002, EEOC will continue its commitment to reduce charge inventories through a Comprehensive Enforcement Program that ensures collaboration between investigatory and legal staff in all phases of the Commission's work, including outreach, intake, and investigation, to expedite charge resolution; and, when cases are not settled through mediation, to ensure that these, and other older and more complex cases, are addressed in a fair and efficient manner. The increase for 2002 will enable EEOC to maintain its core enforcement programs

in the private and federal sectors, continuing progress in delivering fair and efficient service to the public.

State and local grants.—This activity provides funds to State and local fair employment practice agencies to assist in the resolution of employment discrimination complaints. For 2002, the agency will continue working with State and Local Fair Employment Practices Agencies and Tribal Employment Rights Organizations to improve employment discrimination charge processing and other approaches for addressing workplace discrimination.

The purpose of the Export-Import Bank (Eximbank) is to aid in the financing and promotion of U.S. exports. To accomplish its objectives, the bank's authority and resources are used to: assume commercial and political risks that exporters or private institutions are unwilling or unable to undertake; overcome maturity and other limitations in private sector export financing; assist U.S. exporters to meet officially sponsored foreign export credit competition; and provide leadership and guidance in export financing to the U.S. exporting and banking communities and to foreign borrowers. The bank provides its export credit support through direct loan, loan guarantee and insurance programs. The bank is actively assisting small- and medium-sized businesses.

The 2002 budget proposes a 25 percent decrease in program budget resources, in part to reflect lower estimates of international lending risk. Within the proposed program budget, Export-Import Bank can continue to support exporters facing subsidized competition through policy changes that further target assistance on exporters who cannot obtain private sector financing when competing with foreign subsidies.

The bank's request for administrative expenses for 2002 is \$65 million.

As required by the Federal Credit Reform Act of 1990, this account records, for Eximbank, the subsidy costs associated with direct loans and direct grants obligated, and loan guarantees and insurance committed in 1992 and beyond, as well as administrative expenses. The subsidy amounts are estimated on a present value basis; administrative expenses are estimated on a cash basis.

Operating results and financial condition.—The bank is a wholly owned Government corporation. Capital stock of \$1 billion was purchased by the U.S. Treasury, and the bank is authorized to borrow up to \$6 billion from the Treasury. The bank pays interest on such borrowings.

The bank has a reserve for possible credit losses, which provides for the risk of loss inherent in the lending process. This reserve is a general reserve, available to absorb credit losses related to the total loan portfolio. The reserve is increased by provisions charged to expenses and decreased by charge-offs, net of recoveries.

The provision for possible credit losses is based on the bank's evaluation of the adequacy of the reserve, taking into consideration a variety of factors, including repayment status of loans, future risk factors, the relationship of the reserve to the portfolio, and worldwide economic conditions. Providing for such possible losses does not imply that any loans will be written off. It simply recognizes the fact that the prospects for collection of some of the bank's loans are impaired. It does not provide for losses on a country-by-country basis and is intended only to provide an overall revaluation of the loan portfolio.

The bank's net operating income was \$346 million in 2000. Total Government deficit in the corporation was \$173 million on September 30, 2000.

The Farm Credit Administration (FCA) is an independent Federal agency that examines and regulates the Farm Credit System (System) for safety and soundness. The System is a cooperative agricultural credit system of farm credit banks and associations that lends to farmers, ranchers, and their cooperatives. Since 1990, the FCA also performs annual examinations of the Federal Agricultural Mortgage Corporation. In addition, FCA annually examines The National Consumer Cooperative Bank and its affiliate, The NCCB Development Corporation.

As of October 1, 2000, the System was comprised of six Farm Credit Banks, one Agricultural Credit Bank, 158 associations, four service corporations, the Federal Farm Credit Bank Funding Corporation, the Farm Credit System Financial Assistance Corporation, and the Federal Agricultural Mortgage Corporation. The Agricultural Credit Bank makes loans to agricultural, aquatic, and public utility cooperatives and other persons or organizations owned by or having transactions with such cooperatives.

Assessments based upon estimated administrative expenses are collected from institutions in the System and the Federal Agricultural Mortgage Corporation and are available for administrative expenses. Obligations are incurred within fiscal year budgets approved by the Farm Credit Administration Board.

The Farm Credit System Financial Assistance Corporation (FAC) was created by the Agricultural Credit Act of 1987 to provide funds to System institutions experiencing financial difficulties. Authority for FAC to issue obligations and provide assistance expired in 1992, after \$1.26 billion in FAC debt had been issued. Proceeds of FAC debt issuances were paid into, and amounts for assistance and other expenses were paid from, the FAC Assistance Fund. The FAC was re-classified from a Government-sponsored enterprise to a Federal entity beginning in 1993, when most of the private capital in FAC, provided by the System, was rebated from the FAC Trust Fund pursuant to the Reconciliation and Agriculture Appropriations Acts of 1989.

The Farm Credit System Insurance Corporation (Corporation) was established to ensure the timely payment of principal and interest on System debt obligations purchased by investors. The Corporation is managed by a three member Board of Directors that consists of the same members as the Farm Credit Administration Board of Directors. The Corporation derives its revenues from insurance premiums collected from insured System banks and from the investment income earned on its investment portfolio. Insurance premiums are assessed on System banks based on the level of accruing and non-accruing loans outstanding in each bank and its affiliated associations' loan portfolio. Congress established a secure base amount of 2 percent of outstanding System obligations, or such other amounts determined by its Board of Directors to be actuarially sound to maintain the Insurance Fund. The Insurance Fund was at the secure base amount at September 30, 2000. Also in September, the Corporation's Board reduced premiums beginning in January 2001 to zero for all loan categories.

The Insurance Fund is available for payment on System obligations if an insured System bank defaults on its primary liability. The Insurance Fund is also available to ensure the timely retirement of certain eligible borrower stock, pay the operating costs of the Corporation, and satisfy defaults by System institutions on obligations issued by the FAC after amounts in the FAC Trust Fund are exhausted. The Corporation can exercise its authority to make loans, purchase System bank assets or obligations, provide other financial assistance and otherwise act to reduce its exposure to losses.

The Corporation has the authority to make refunds of excess Insurance Fund balances. No refunds are anticipated before 2006.

On June 8, 2000, the Commission awarded Qualcomm, Inc. a transferable Auction Discount Voucher (ADV) in the amount of \$125,273,878, in satisfaction of the court's mandate in *Qualcomm Incorporated v. FCC*, 181 F.3d 1370 (D.C. Cir. 1999). This Auction Discount Voucher is structured to work in the same manner as an auction bidding credit. The budget records an outlay and a debt in the year it was issued. It may be used by Qualcomm or its transferee, in whole or in part, to adjust a winning bid in any spectrum auction for which short form applications have been accepted prior to June 8, 2003, subject to terms and conditions set forth in the Commission's Order. When it is used, the budget will record a collection and reduction in debt. See *Qualcomm Incorporated Petition for Declaratory Ruling Giving Effect to the Mandate of the District of Columbia Circuit Court of Appeals*, Order, FCC 00-189 (rel June 8, 2000).

The Telecommunications Act of 1996 provides for a major restructuring of the Nation's communications laws, promotes universal service and open access to information networks, and provides for flexible government regulations. Under the Act, telecommunications carriers that provide interstate telecommunications services are required to contribute funds for the preservation and advancement of universal service. The contributions are used to provide services eligible for universal service support as prescribed by the FCC. Telecommunications carriers receive a credit towards their contribution by providing discount service to schools, libraries, and health care providers. Support will also be provided to carriers offering services in high cost areas of the United States and to carriers offering services to low income consumers.

The Administration will propose legislation authorizing the FCC to establish a lease fee on the use of analog spectrum by commercial television broadcasters. The FCC will promulgate a rulemaking to apportion the aggregate fee amount among broadcasters. Upon return of its analog spectrum license to the FCC, an individual broadcaster is exempt from the fee. The FCC will be authorized to recover up to \$2 million from the fee collections in 2002 in order to cover the costs of developing and implementing the fee program. (See General Fund Receipts section for estimated fee collections.)

This program provides for direct loans for the purpose of purchasing spectrum licenses at the Federal Communications Commission's auctions. The licenses are being purchased on an installment basis, which constitutes an extension of credit. The first year of activity for this program was 1996.

As required by the Federal Credit Reform Act of 1990, this account records, for this program, the subsidy costs associated with the direct loans obligated in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis and administrative expenses are estimated on a cash basis.

The Administration will propose legislation regarding the auction of spectrum currently assigned to television channels 60-69 (747-762 and 777-792 MHz) and 52-59 (698-746 MHz). The legislation will: promote clearing the spectrum in channels 60-69 for new wireless services in a manner that ensures incumbent broadcasters are fairly compensated; shift the statutory deadline for the 60-69 (700 MHz) auction from 2000 to 2004; and shift the statutory deadline for the auction of channels 52-59 from 2002 to 2006.

FEDERAL DEPOSIT INSURANCE CORPORATION

The Federal Deposit Insurance Corporation (FDIC or Corporation) was created by the Banking Act of 1933 to provide protection for bank depositors and to foster sound banking practices. The Financial Institutions Reform Recovery and Enforcement Act of 1989 established the Bank Insurance Fund (BIF), the Savings Association Insurance Fund (SAIF), and the Federal Savings and Loan Insurance Corporation (FSLIC) Resolution Fund (FRF). The Federal Deposit Insurance Corporation Improvement Act of 1991 generally requires the Corporation to use the least costly method to resolve failed banks, and mandates that the Corporation take prompt corrective action against under-capitalized financial institutions.

The deposit insurance ceiling protection has been \$100,000 since March 31, 1980. In order to accomplish its varied functions to protect depositors, the Corporation is authorized to promulgate and enforce rules and regulations relating to the supervision of insured institutions and to perform other regulatory and supervisory duties consistent with its responsibilities as an insurer. The Corporation is required to set assess-

ment rates for insured financial institutions semi-annually to maintain the reserves of the BIF and SAIF at 1.25 percent of total insured deposits.

The BIF, a public enterprise revolving fund, derives its income principally from insurance assessments paid by insured banks. The revolving fund represents the accumulated net income of the BIF and is reserved for the protection of depositors in insured banks, as well as for the payment of administrative and insurance expenses. As of September 2000, BIF's fund balance totaled \$30 billion, excluding reserves for future failed bank resolutions. The net worth of the BIF reached 1.25 percent of total insured deposits in May 1995.

The Federal Deposit Insurance Corporation Improvement Act of 1991 authorizes the FDIC to borrow up to \$30 billion from the Treasury to cover deposit insurance losses and provide additional loans from the Federal Financing Bank for working capital purposes. The BIF is not expected to borrow any of the \$30 billion line of credit from the Treasury or from the Federal Financing Bank to finance working capital needs.

The Administration proposes to require the FDIC and the Federal Reserve to recover their, respective costs for supervision and regulation of state-chartered banks and bank holding companies. In establishing the amount of the proposed collections, the appropriate Federal banking agency shall allow an appropriate credit for fees paid to state bank supervisory agencies. Additionally, the appropriate Federal regulators will not recover supervision and regulation costs from banks with less than \$100 million in assets. This proposal will increase interest income and premium income collected by the Bank Insurance Fund for 2001-2005; these two effects are shown separately above.

The SAIF insures depository institutions formerly insured by the Federal Savings and Loan Insurance Corporation. In July 1995, SAIF assumed responsibility for resolving failed thrifts from the Resolution Trust Corporation (RTC).

The Deposit Insurance Funds Act of 1996 imposed a special assessment to bring SAIF's reserves up to 1.25 percent of insured deposits. By the end of 1998, SAIF's reserve ratio reached 1.39 percent. However, on January 1, 1999, FDIC was required by law to transfer all funds in the SAIF above 1.25 percent to a Special Reserve. Approximately \$1 billion was transferred. The Gramm Leach Bliley Act of 1999 eliminated the Special Reserve. Approximately \$1 billion was transferred to the SAIF on November 12, 1999. The transfer increased the reserve ratio to 1.45 percent. As of September 30, 2000, the reserve ratio was 1.45 percent.

The FSLIC Resolution Fund (FRF) is the successor to FSLIC assets and liabilities from thrift resolutions prior to August 1989. Beginning in August 1989, the RTC assumed responsibility for the FSLIC's unresolved cases. On December 31, 1995, the RTC was terminated and its assets and liabilities were transferred to FRF.

Funds for FRF operations have come from: income earned on its assets; liquidation proceeds from receiverships; the proceeds of the sale of bonds by the Financing Corporation; and, a portion of insurance premiums paid by SAIF members prior to 1993. The Financial Institutions Reform, Recovery, and Enforcement Act authorizes appropriations to make up for any shortfall. The FRF will terminate upon the disposition of all its assets, and any net proceeds will be paid to the Treasury. Net proceeds from the former RTC will be paid to the Resolution Funding Corporation.

FDIC's Office of Inspector General (OIG) is an independent unit within the Corporation that conducts audits and investigations of corporate activities and assists the Corporation in preventing and detecting fraud, waste, abuse, and mismanagement. The OIG was established by the FDIC Board of Directors pursuant to the Inspector General Act amendments of 1988 (Public Law 100-504). The Resolution Trust Corporation Completion Act, enacted December 17, 1993, provided that the FDIC Inspector General be appointed by the President and confirmed by the Senate. The Completion Act, thus, added FDIC to the establishments whose OIGs have separate appropriation accounts under Section 1105(a) of Title 31, United States Code. The OIG's first appropriation was for its fiscal year 1998 expenses. The OIG's appropriations are derived from the Bank Insurance Fund, the Savings Association Insurance Fund, and the FSLIC Resolution Fund.

The High Intensity Drug Trafficking Areas (HIDTA) program was established by the Anti-Drug Abuse Act of 1988, as amended, and the Office of National Drug Control Policy's reauthorization, P.L. 105-277, to provide assistance to Federal, State and local law enforcement entities operating in those areas most adversely affected by drug trafficking. Since January, 1990, counties in 28 areas have been designated as HIDTAs: New York; Los Angeles; Miami; Houston; Balti-

more/Washington, DC; Puerto Rico/Virgin Islands; Southwest Border, which includes South Texas, West Texas, New Mexico, Arizona and Southern California; Chicago; Atlanta; Philadelphia/Camden; Gulf Coast (Alabama, Louisiana, and Mississippi); Lake County (Indiana); Midwest (Iowa, Kansas, Missouri, Nebraska, North Dakota, and South Dakota); Pacific Northwest (Washington); Rocky Mountain (Colorado, Utah, and Wyoming); Northern California (San Francisco Bay area); South Eastern Michigan; Appalachia (Kentucky, Tennessee, and West Virginia); Central Florida; Milwaukee; North Texas; Central Valley California; Hawaii; New England (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont); Ohio; Oregon; Northern Florida; and Nevada.

Funds made available under the HIDTA program are disbursed at the discretion of the Director of the Office of National Drug Control Policy for joint local, State, and Federal initiatives.

The HIDTA program provides funding to enhance and coordinate drug-control activities among State, local and Federal law enforcement agencies participating in designated High Intensity Drug Trafficking Areas. Funding for State and local law enforcement agencies is provided through grants from ONDCP. Funding for Federal agencies is provided through transfers to those agencies. All funding in the HIDTA program is awarded at the discretion of the Director of ONDCP, based on a review of proposed budgets submitted by the HIDTAs. Estimates for the 2002 transfers to Federal agencies cannot be determined until proposed budgets for that year are reviewed.

The HIDTA appropriation also provides funding for services and activities related to auditing State and local grants and Federal transfers.

The Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (Public Law 101-73, August 9, 1989) established the Appraisal Subcommittee of the Federal Financial Institutions Examination Council. Subsequent legislation (Public Law 101-235) authorized the Secretary of the Department of Housing and Urban Development to designate a member of the Appraisal Subcommittee.

The Subcommittee is charged with ensuring that real estate appraisals used in federally-related transactions are performed in accordance with uniform standards by appraisers certified and licensed by the States. Its responsibilities include: (1) monitoring the requirements established by the States for the certification and licensing of appraisers; (2) monitoring the requirements established by the Federal financial institutions' regulatory agencies regarding appraisal standards; (3) monitoring and reviewing the practices, procedures, activities, and organization of the Appraisal Foundation; and, (4) maintaining a national registry of licensed and certified appraisers.

Subcommittee activities, including grants awarded to the Appraisal Foundation, were initially funded from a one-time appropriation of \$5 million. These funds were repaid to Treasury at the end of 1998 in accordance with the Economic Growth and Regulatory Paperwork Reduction Act of 1996. The Subcommittee is now operating on fee income from state-licensed and certified real estate appraisers in the national registry.

The Federal Labor Relations Authority (FLRA): (1) serves as a neutral party in the settlement of disputes that arise between unions, employees, and agencies on matters outlined in the Federal Service Labor Management Relations Statute;

(2) decides major policy issues; (3) prescribes regulations; and, (4) disseminates information appropriate to the needs of agencies, labor organizations, and the public. Establishment of the FLRA gives full recognition to the role of the Federal Government as an employer.

In addition, the FLRA is engaged in case-related interventions and training and facilitation of labor-management relationships in its unified Collaboration and Alternative Dispute Resolution Program. Approximately 1400 case-related intervention services were conducted in 2000. Training and facilitation workload is reflected in the following manner: the FLRA promotes labor-management cooperation by providing training and assistance to labor organizations and agencies on resolving disputes; and trains the parties on rights and responsibilities under the Federal Labor Relations Management Statute. In 2000, the FLRA conducted over 300 programs involving over 12,000 employees, union representatives, arbitrators, and other practitioners.

The FLRA is composed of the Authority, the Office of the General Counsel, and the Federal Service Impasses Panel.

Authority.—The Authority adjudicates labor-management disputes in the Federal sector including: appeals on negotiability issues; exceptions to arbitration awards; appropriate units for the purposes of exclusive recognition; eligibility of labor organizations for national consultation rights; and unfair labor practice complaints.

Within the Authority, administrative law judges hold hearings on unfair labor practice complaints, issue reports, and make recommendations to the Authority to allow timely settlement of disputes arising between agencies and unions. The Authority also provides all components with administrative services.

The Office of the Inspector General is responsible for conducting and supervising audits and investigations related to the functions of the FLRA, pursuant to the provisions of the Inspector General Act of 1978, as amended in 1988.

Case dispositions are reflected in the following table:

The Federal Mediation and Conciliation Service (FMCS or the Service) provides assistance to parties in labor disputes

in industries affecting commerce through conciliation and mediation.

Dispute mediation.—The Service assists labor and management in the mediation and prevention of disputes, other than those involving rail and air transportation, whenever such disputes threaten to cause a substantial interruption of interstate commerce or a major impairment to the national defense. The Service also makes mediation and conciliation services available to Federal agencies and organizations representing Federal employees in the resolution of negotiation disputes. The Service provides mandatory mediation and, where necessary, impartial boards of inquiry to assist in resolving labor disputes involving private nonprofit health care institutions. The workload shown below includes assignments closed in both the private and public sectors.

The Federal Retirement Thrift Investment Board is responsible for managing the Thrift Savings Fund (Fund). The Fund is a special tax-deferred savings fund established by the Federal Employees' Retirement System Act of 1986. Due to the fiduciary nature of the Fund, it is not included in the totals of the Federal budget. Information on the financial status and activities of the Fund follows this account.

Program administration for the Fund is financed from the Fund. Program expenses are derived first from Fund forfeitures of agency one percent automatic contributions for employees who separate from the Federal government prior to vesting and then from earnings on all participant and agency contributions to the Fund.

INFORMATION SCHEDULES FOR THE THRIFT SAVINGS FUND

The Fund is composed of individual accounts maintained by the Federal Retirement Thrift Investment Board on behalf of the individual Federal employee participants in the Fund. All Federal employees are eligible to contribute to the Fund. However, only those employees covered by the Federal Employees' Retirement System have their contributions matched by employing agencies in accordance with the formulas prescribed by law. Employees are currently entitled to select how contributions are distributed among three investment funds: a U.S. Government securities investment fund; a common stock index investment fund; and, a fixed income index investment fund. A small capitalization stock index investment fund and an international stock index fund are planned for implementation during 2001.

Employee participation in the Fund is entirely voluntary, so actual results could vary significantly from these estimates. The estimated status of the Fund is shown below:

The FTC seeks to protect consumers and enhance competition by eliminating unfair or deceptive acts or practices in the marketing of goods and services and by ensuring that consumer markets function competitively. The FTC's work is based on the belief that competition among producers, and accurate information in the hands of consumers, bring the best products and lowest prices to marketplace, spur innovation, and strengthen the economy.

Consumer protection.—The Commission is charged with eliminating unfair or deceptive acts or practices affecting commerce. The goal of the consumer protection mission is to prevent fraud, deception, and unfair business practices in the marketplace. The mission works to accomplish this goal through three objectives: (1) identify fraud, deception, and unfair practices that cause the greatest consumer injury; (2)

stop fraud, deception, and unfair practices through law enforcement; and, (3) prevent consumer injury through education.

Maintaining competition.—The Commission's efforts are aimed at fostering and preserving our competitive market. The goal of the maintaining competition mission is to prevent anticompetitive mergers and other anticompetitive business practices in the marketplace. The mission works to accomplish this goal through three objectives: (1) identify anticompetitive mergers and practices that cause the greatest consumer injury; (2) stop anticompetitive mergers and practices through law enforcement; and, (3) prevent consumer injury through education.

The President's 2002 request will fund a total of 1,080 FTE, which includes 6 reimbursable FTE. The program level for the Commission will increase from \$147.2 million in 2001 to \$156.3 million in 2002, allowing the Commission to maintain the current performance of its missions. The 2002 requested program level will be fully funded by fees assessed on Hart-Scott-Rodino Act premerger notification filings as authorized by section 605 of Public Law 101-162, as amended.

The Intelligence Community Management Account (ICMA) was established by Congressional direction to provide resources that directly support the Director of Central Intelligence (DCI) and the Intelligence Community as a whole in coordinating cross-program activities, improving budget oversight, and strengthening Community Management. The ICMA includes the Community Management Staff, the National Intelligence Council, the Center for Security Evaluations, the office of the Intelligence Community Chief Information Officer (CIO), the Advanced Research and Development program, the National Counterintelligence Center, and the National Drug Intelligence Center.

The Community Management Staff is the DCI's principal source of advice and assistance in planning and executing his intelligence community management responsibilities. These include: developing the National Foreign Intelligence Program budget; developing intelligence plans and requirements; and overseeing research and development activities. The Advanced Research and Development program is responsible for coordination of advanced technology within the Intelligence Community and for encouragement of investment in high risk/high return technologies. The National Intelligence Council provides analytical support to the DCI and national policy makers. The Center for Security Evaluation is responsible for evaluating and improving security capabilities at United States embassies. The office of the CIO supports technical activities and services of common Community concern regarding interoperability between national intelligence systems and consumers. The National Counterintelligence Center

was established as the primary mechanism to coordinate U.S. government national-level counterintelligence policy and activities. The National Drug Intelligence Center was established to coordinate strategic organizational drug intelligence from national security and law enforcement agencies.

The U.S. International Trade Commission is an independent, quasi-judicial federal agency established by Congress with a wide range of trade-related mandates. The mission of the Commission is twofold: administer U.S. trade remedy laws in a fair and objective manner; and provide the President, the United States Trade Representative, and the Congress with independent, quality advice and information on matters of international trade and competitiveness.

For 2002, the Commission requests an appropriation of \$51 million in order to fund existing mandated investigative activity and related operations, a mandatory 3.7 percent pay increase, and information technology projects that are designed to improve electronic transaction capability, provide broader public access to public data and other information, develop more timely and accurate trade information for the trade community, and improve transparency in the Commission's procedures and finances. The 2002 request represents a 5.25 percent increase over its 2001 funding availability of \$49 million and a 6.9 percent increase over the 2001 appropriation of \$48 million.

In October 1998, the Commission issued the third edition of its Strategic Plan and is currently implementing the 2001 Performance Plan. For the purpose of developing the Strategic Plan, the Commission's functions were divided into five operations and, in order to facilitate the linkage of financial resources to the achievement of strategic goals, the budget justification is structured in the same manner. There are 20 strategic goals for the five operations. In 1999 and 2000 these goals were met in virtually all instances.

As presented in the Commission's Strategic Plan, there are five major operations that serve the Commission's external customers:

- *Import Injury Investigations:* These cover the conduct of the Commission's countervailing duty, antidumping, and sunset review investigations (collectively known as Title VII investigations), safeguards and market disruption investigations, and appellate litigation of challenges to the Commission's determinations.

- *Intellectual Property-Based Import Investigations:* These cover the conduct of the Commission's adjudicatory investigations (referred to as section 337 investigations) regarding alleged unfair methods of competition and unfair acts in the importation of goods into the United States and most frequently involve allegations of patent or trademark infringement.

- *Research:* This covers all activities related to the acquisition, maintenance, and application of analytical and technical trade expertise. This expertise is applied through studies regarding the performance and global competitiveness of various U.S. industries, the impact of changes in trade policy on the overall economy or subsets thereof, trade and competitiveness issues, and the probable economic effect of tariff reductions and trade agreements.

- *Trade Information Services:* This covers a wide range of activities that provide Commission staff, the Congress, the Executive Branch, and the general public with reliable and timely trade information and analysis. These activities include work on legislative reports for Congress, the maintenance and publication of Harmonized Tariff Schedule of the United States, maintenance of a tariff and trade database (Dataweb), and library services. Also included within this operation is the development of trade data compilations tailored

for use by U.S. negotiators, and nomenclature expertise and related assistance to U.S. trade negotiating delegations (principally to the World Trade Organization and the World Customs Organization) as well as Congressional staff.

- *Trade Policy Support:* This covers direct support activities for policy makers such as the provision of technical expertise and objective information on trade issues to congressional committees and members' offices, the United States Trade Representative, interagency committees, and U.S. delegations to multilateral organizations.

All of these operations define the output of the Commission, emphasizing the benefits that the Commission provides in facilitating an open trading system based on the rule of law and economic self-interest. Within each operation, specific critical success indicators and strategic goals are identified. The Commission's Strategic Plan, Performance Plan, and Performance Report are available at <http://www.usitc.gov/webinfcn.htm>.

Pursuant to section 175 of the Trade Act of 1974, the budget estimates for the Commission are transmitted to Congress without revision by the President.

Public Laws 99-500, 101-208, and 102-221 established the James Madison Memorial Fellowship Foundation to operate a fellowship program to encourage graduate study of the framing, principles, and history of the American Constitution. Appropriations of \$10 million in 1988 and 1989 established the foundation's trust fund. The funds have been invested by the Secretary of the Treasury in U.S. Treasury securities, and the interest earned on these funds is available for carrying out the activities of the foundation. Funds raised from private sources and the surcharges from commemorative coin sales are also placed in the trust fund.

The foundation is authorized to award graduate fellowships of up to \$24,000 to high school teachers of American history, American government, and social studies. College seniors and recent college graduates who want to become secondary school teachers of these subjects are also eligible.

Fellowship awards.—This activity is comprised of fellowship awards to cover educational expenses. It also supports the foundation's annual Summer Institute on the U.S. Constitution, which all current fellows are required to attend. The Institute is an intensive educational experience that will ensure that all fellows know the history of the framing, ratification, and implementation of the U.S. Constitution and the Bill of Rights. The foundation awarded 65 fellowships in 2000 and plans to award at least 60 in both 2001 and 2002.

Program administration.—This activity covers the costs of planning, fund-raising, and the operation of the fellowship program.

Established by the Civil Service Reform Act of 1978, the Board serves as guardian of the Federal Government's merit-based system of employment, principally by hearing and deciding appeals from Federal employees of removals and other major personnel actions. The Board also hears and decides other types of civil service cases, reviews regulations of the Office of Personnel Management, and conducts studies of the merit systems. The intended results (outcomes) of MSPB's efforts are to assure that (1) personnel actions taken involving employees are processed within the law, and (2) actions taken by OPM and other agencies support and enhance Federal merit principles.

The number of decisions issued by the Board is shown in the following table:

The U.S. Institute for Environmental Conflict Resolution is a Federal program established by P.L. 105–156 to assist parties in resolving environmental, natural resource, and public lands conflicts. The Institute is part of the Morris K. Udall Foundation, and serves as an impartial, non-partisan institution providing professional expertise, services, and resources to all parties involved in such disputes. The Institute helps parties determine whether collaborative problem solving is appropriate for specific environmental conflicts, how and when to bring all the parties to the table, and whether a third-party facilitator or mediator might be helpful in assisting the parties in their efforts to reach consensus or to resolve the conflict. In addition, the Institute maintains a roster of qualified facilitators and mediators with substantial experience in environmental conflict resolution, and can help parties in selecting an appropriate neutral. (See www.ecr.gov for more information about the Institute.)

Public Law 102-259 established the Morris K. Udall Scholarship and Excellence in National Environmental Policy Foundation to provide educational resources to promote studies in the natural environment and Native American public health and tribal policy. In addition, the Foundation is authorized to fund the Udall Center for Studies in Public Policy at the University of Arizona to carry out and manage programs established by the Foundation relating especially to a program of environmental conflict resolution.

In 2000, the Foundation awarded 80 undergraduate scholarships. Twelve Native American Congressional Summer Internship Program recipients spent ten weeks in Congressional offices and the White House participating in a program created by the Udall Foundation. For the fourth year, the Foundation awarded two Graduate Fellowships to Ph.D. candidates whose dissertation topics were in the area of environmental public policy and conflict resolution and whose work contributed to the mission of the Foundation.

In 2001 and 2002, the Foundation will maintain its current level of scholarships, fellowships and internships.

The National Archives and Records Administration (NARA) provides for basic operations dealing with management of the Government's archives and records, operation of Presidential Libraries, and for the review for declassification of classified security information.

Records services.—This activity provides for selecting, preserving, describing, and making available to the general public, scholars, and Federal agencies the permanently valuable historical records of the Federal Government; the historical materials and Presidential records in Presidential Libraries; for preparing related publications and exhibit programs; and for conducting the appraisal of all Federal records.

Through the records declassification program, historically valuable information in the records of the Federal Government and in donated historical materials are made available to the public by declassifying as much information as possible without endangering the national security.

This activity also provides oversight for the information security program established by Executive Order 12958 as amended by Executive Order 13142 and reports annually to the President on the status of that program. It is also responsible for policy oversight for the National Industrial Security Program established under Executive Order 12829.

NARA, in research and development collaboration with national and international partners, is building an Electronic Records Archives (ERA) that will ensure the preservation of and access to Government electronic records. The pace of technological progress makes formats in which the records are stored obsolete within a few years, threatening to make them inaccessible even if they are preserved intact. ERA will preserve electronic records, regardless of the original format, retain them indefinitely, and enable requesters to access them on computer systems now and in the future.

Archives related services.—This activity provides for the publication of the *Federal Register*, the *Code of Federal Regulations*, the *U.S. Statutes-at-Large*, and Presidential documents, and for a program to improve the quality of regulations and the public's access to them.

This activity also includes the administration and reference services portion for the National Historical Publications and Records Commission. This Commission makes grants nationwide to preserve and publish records that document American history.

Archives II Facility.—Provides for construction and related services of the new archival facility which was opened to the public in 1993. Costs of construction are financed by \$302 million of federally guaranteed debt issued in 1989. Since 1994 and continuing in 2002, the Archives seeks appropriations for the annual payments for interest and redemption of debt to be made under the contract for construction and related services.

The insurance fund is used to carry out a program of insurance for member accounts in Federal credit unions and State-chartered credit unions which apply and qualify for insurance, authorized by Public Law 91-468, enacted October 19, 1970.

Budget program.—The activities consist of: (a) providing member account insurance, (b) formulating standards and requirements for insured credit unions, and (c) providing for liquidation or other disposition of the assets and liabilities of solvent and insolvent insured credit unions. The fund also

reimburses the operating fund for its share of the Agency's administrative costs. The reimbursement percentage, which is reviewed and adjusted periodically, is currently at 62.54 percent.

The extent of the program is estimated as follows:

Item:	2000 actual	2001 est.	2002 est.
Number of insured credit unions	10,480	10,166	9,861
Insured shares of member institutions as of June 30 (in millions of dollars)	\$348,111	\$362,035	\$376,517

It is estimated that approximately 3,892 State-chartered credit unions will be enrolled in the program by the end of 2001.

Financing.—For insurance year 2000 the credit union's required annual insurance premium of one-twelfth of 1 percent of its total member share accounts has been waived. As a result of Public Law 98-369 (July 18, 1984), each insured credit union is also required to deposit and maintain in the insurance fund 1 percent of its member share accounts. The fund is structured to be entirely self supporting through the monies paid by member credit unions. The monies received plus the income generated from their investment are expected to cover all administrative and financial costs, as well as increase the fund balance proportionate to insured share growth. In 2000 the income generated from the 1 percent deposit eliminated the need to assess the annual premium. In addition, the fund is anticipated to pay a \$118 million dividend to federally insured credit unions in 2001 due to an excess in the 1.3 percent reserve requirement. The fund has \$100 million in borrowing authority from the Treasury for use in unforeseen emergencies. The reserve requirement was changed in 2000 due to the provisions of the Credit Union Membership Access Act (P.L. 105-219), which requires the normal operating level, an equity ratio specified by the Board, to be not less than 1.2 percent and not more than 1.5 percent. For 2000, the normal operating level was set at 1.3 percent prior to the beginning of the calendar year.

Operating results.—Anticipated net income of \$197 million will be retained in the fund, raising the balance for unforeseen emergencies to \$5.3 billion by the end of 2002.

The National Credit Union Central Liquidity Facility was established under Public Law 95-630. It began operations on October 1, 1979. The Central Liquidity Facility provides loans to member credit unions for seasonal and emergency needs.

The two primary sources of funds for the Facility are stock subscriptions from credit unions and borrowings from the Federal Financing Bank. Credit unions, which choose to become members of the Facility, are required to purchase stock equal to one-half of 1 percent of their assets. One-half of the subscription in stock is forwarded to the Facility and deposited in the fund. The remaining half of the subscription remains on call in the credit union in investments as approved by the NCUA Board.

The National Endowment for the Arts provides grants to, or contracts with, groups, individuals of exceptional talent in specified fields, and State or regional organizations engaged in or concerned with the arts in service to the American public. Programs encourage individual and institutional development of the arts, education in the arts, preservation of the American artistic heritage, wider availability and appreciation of the arts, leadership in the arts, and the stimulation of non-Federal sources of support for the Nation's artistic activities.

This presentation includes Gifts and Donations and the Arts and Artifacts Indemnity Fund which previously had been shown separately.

The National Foundation on the Arts and the Humanities Act of 1965, as amended, authorizes the Arts Endowment to receive money and other donated property. Such gifts may be used, sold, or otherwise disposed of to support arts projects and activities. Budget authority in this schedule reflects cash received each year by the Arts Endowment.

The Arts and Artifacts Indemnity Act of 1975, as amended authorizes the Federal Council on the Arts and Humanities to enter into indemnity agreements to cover certain eligible works of art while on traveling exhibition in the United States or abroad. Loss or damage claims certified by the Council are paid from this fund.

The National Endowment for the Humanities funds activities to improve the quality of education and teaching in the humanities, to strengthen basic humanities research and original scholarship, to preserve cultural and intellectual re-

sources, and to advance understanding of the humanities among general audiences.

Support is provided through outright grants, matching grants, and a combination of the two. Eligible applicants include state humanities councils, schools, higher education institutions, libraries, museums, historical organizations, professional associations, other cultural institutions, and individuals.

This presentation also includes the Gifts and Donations account. The National Foundation on the Arts and the Humanities Act of 1965, as amended, authorizes the Humanities Endowment to receive money and other donated property. Such gifts may be used, sold, or otherwise disposed of to support humanities projects and activities. Budget authority in this schedule reflects cash received each year by the Endowment.

The Board resolves representation disputes in industry, and remedies and prevents specified unfair labor practices by employers or labor organizations. Case intake and additional program statistics appear in the table below.

PROGRAM STATISTICS

	2000 actual	2001 est.	2002 est.
Case intake:			
Unfair labor practice cases	27,021	30,000	30,000

Board decisions requiring court enforcement	118	121	123

Field investigation.—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated by regional office personnel. Ninety percent of the unfair labor practice cases and 85 percent of the representation cases are closed by settlement, dismissal, or withdrawal. The remainder are prepared for public hearing. The agency strives to maximize the voluntary settlement of all cases and to avoid litigation.

Administrative law judge hearing.—Administrative law judges conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in their decisions.

Board adjudication.—In an unfair labor practice case, a judge's decision becomes a Board order if no exceptions are filed. About 30 percent of these decisions become automatic Board orders or are complied with voluntarily. The remainder, with exceptions filed, requires contested Board decision. In representation cases, regional directors initially decide the issues by Board delegation. The Board itself decides representation issues on referral from regional directors or by granting a request for review of a regional director's decision. The Board also rules on objection and challenge questions in election cases.

Securing compliance with Board orders.—If the parties do not voluntarily comply with the Board's order involving unfair labor practices, the Board must request that the appellate courts enforce its decisions.

Mediator and alternative dispute resolution (ADR) services.—The Board mediates disputes over wages, hours, and working conditions for some 746 rail and air carriers and approximately 795,000 employees in the two industries.

The Board also provides technical assistance to enable labor and industry representatives to explore informally the relevant economic and noneconomic problems that condition collective bargaining in the railroad and airline industries. The Board's ADR program provides collective bargaining training, facilitation, and grievance mediation services to the labor-management community.

Emergency disputes.—When the parties fail to resolve their disputes through mediation, they are urged to submit their differences to arbitration. If neither mediation nor voluntary arbitration is successful, the President, when notified of disputes which substantially threaten to interrupt essential service, may appoint emergency boards to investigate and report on the dispute. Such reports usually serve as a basis for resolving the disputes.

Public Law 89-456 provides for the adjustment of disputes involving grievances resulting from interpretation or application of bargaining agreements in the railroad industry otherwise referable to the NRAB.

Administrative direction and support for the public law boards, special boards of adjustment, and the NRAB are provided by Federal employees who are compensated by the National Mediation Board.

The National Transportation Safety Board (NTSB), as an independent nonregulatory agency, is charged with promoting transportation safety through the investigation of accidents, the conduct of special studies, the development of recommendations to prevent accidents, the evaluation of the effectiveness of other Government agencies in preventing transportation accidents, and the review of appeals of adverse certificate and civil penalty actions taken by the Administrators of agencies of the Department of Transportation involving airman and seaman certificates and licenses.

In 2002, the Administration requests a total funding level of \$64 million for NTSB Salaries and Expenses to allow the NTSB to fulfill its role in improving safety on the Nation's transportation system.

The National Transportation Safety Board is mandated by Congress to investigate all catastrophic transportation accidents and, therefore, has no control over the frequency of costly accident investigations. The emergency fund provides a funding mechanism by which periodic accident investigation cost fluctuations can be met without delaying critical phases of the investigations. The current balance of \$2 million is sufficient to cover unanticipated costs associated with an increased number of accidents, and thus the Administration does not propose new funding in 2002.

The National Veterans Business Development Corporation (Corporation) was chartered by the 106th Congress in Public Law 106-50. Its mission is to assist America's 25 million veterans to access entrepreneurial training and technical assistance and to organize public and private resources to assist veterans, including service-disabled veterans, to establish and grow their small businesses.

The Corporation is governed by a volunteer Board of Directors, nominated by the Congress and appointed by the President. There are three ex-officio members, the Secretary of Defense, the Secretary of Veterans Affairs, and the Administrator of the Small Business Administration. The majority of the Board of Directors were appointed in September 2000, and have held quarterly meetings since that time.

In 2001, the Corporation created its infrastructure by filing for 501(c)(3) status, adopting bylaws, financial policies, human resources policies, an ethics policy, and developing the Board's committee governance structure. Further, it retained an interim executive director, interim associate director, and interim deputy associate director. Board committees, with interim staff assistance, are securing office space, conducting a search for its chief executive officer and other essential staff, and constructing annual budgets.

In 2002, the Corporation will collaborate with public, private, and non-profit organizations to enhance service delivery to veterans across the nation. Specifically, the Corporation will coordinate with the Small Business Administration's (SBA's) Advisory Committee on Veterans Business Affairs to develop a plan to improve SBA's, and other Federal agencies, outreach and entrepreneurial service delivery to its constituencies, coordinate with the Department of Veterans Affairs' newly-created Center for Veterans Enterprise to increase procurement opportunities for the nation's veterans, and pay particular attention to the Federal Government's progress in meeting the three-percent procurement goal for small businesses owned by service-disabled veterans. The Corporation will also establish a web site with the goal of linking veterans to the wide variety of agencies and organizations that provide entrepreneurial training and technical assistance. As required by law, the Corporation will submit an annual report to the President and the Congress.

Nuclear Reactor Safety.—A major part of the NRC's mission is to ensure that its licensees design, construct, and operate civilian reactor facilities safely. The Atomic Energy Act and the Energy Reorganization Act provide the foundation for regulating the Nation's civilian nuclear power industry. Nuclear reactor safety encompasses all NRC efforts to ensure that civilian nuclear reactor facilities and non-power reactors are operated in a manner that provides adequate protection of public health and safety and the environment, and protects against radiological sabotage and theft or diversion of special nuclear materials. These efforts include reactor licensing; reactor license renewal; operator licensing; financial assurance; inspection; performance assessment; identification and resolution of safety issues; reactor regulatory research; regulation development; operating experience evaluation; incident investigation; threat assessment; emergency response; investigation of alleged wrong doing by licensees, applicants, contractors, or vendors; imposition of enforcement sanctions for violations of NRC requirements; and reactor technical and regulatory training.

Nuclear Materials Safety.—Nuclear materials safety encompasses all NRC efforts to ensure that NRC-regulation aspects of nuclear fuel cycle facilities and nuclear materials activities are handled in a manner that provides adequate protection of public health and safety. These efforts include, licensing/certification, inspection, and enforcement activities; regulation and guidance development; nuclear materials research; identification and resolution of safety and safeguard issues; operating experience evaluation; incident investigation; threat assessment; emergency response; technical training; and investigation of alleged wrongdoing by licensees, applicants, certificate holders, contractors and vendors.

Nuclear Waste Safety.—Nuclear waste safety encompasses the NRC's high-level waste regulatory activities associated with high-level waste disposal at the potential Yucca Mountain repository as mandated by the Nuclear Waste Policy Act, the Nuclear Waste Policy Amendments Act; the Energy Policy Act; NRC regulatory and oversight activities for decommissioning, which involves safely removing a facility from service and reducing residual radiation to a level that permits the property to be released; the safe and secure storage and transportation of radioactive materials through the certification of spent fuel storage containers and transportation packages; and assistance to Agreement States to complete activities associated with the closure of formerly licensed NRC

sites when the original owner or successor cannot be found. Low-level radioactive waste activities associated with the disposal of waste are addressed in accordance with the Low-Level Radioactive Waste Policy Act.

International Nuclear Safety Support.—International Nuclear Safety Support encompasses NRC international activities, some of which support the agency's domestic mission and many of which support broader U.S. national interests. These activities include international policy formulation, export-import licensing of nuclear materials and equipment, treaty implementation, international information exchange activities, and international safety and safeguards assistance, and deterring nuclear proliferation.

Management and Support.—Management and support encompasses NRC central policy direction, legal advice for the Commission, analysis of long-term policy issues, administrative proceedings review and advice, liaison with outside constituents and other government agencies, financial management, all administrative and logistical support, information resources management, executive management services for the Commission, personnel and training, and matters involving small and disadvantaged businesses and civil rights.

The Office of Special Counsel (OSC) (1) investigates Federal employee allegations of prohibited personnel practices (including reprisal for whistleblowing) and when appropriate prosecutes before the Merit Systems Protection Board (MSPB); (2) provides a channel for whistleblowing by Federal employees; and (3) enforces the Hatch Act. The OSC may transmit whistleblower allegations to the agency head concerned and require an agency investigation and a report to the Congress and the President when appropriate.

Overall in 2000, there were more than 7,683 instances in which the assistance or action of the OSC was sought by Federal employees and other persons. Many prohibited personnel practice cases investigated by the OSC are resolved without recourse to formal proceedings before the MSPB. In 2000, the OSC obtained 58 corrective or other favorable actions, and efforts to obtain such negotiated resolutions will continue. In 2000, the OSC also filed eight enforcement actions before the MSPB in prohibited personnel practice and Hatch Act matters. The OSC also issued 2,810 Hatch Act advisory opinions (both written and oral) to people who sought advice. During 2000, the OSC's Disclosure Unit received 422 new disclosure matters for possible referral and eight Disclosure Unit matters were referred to agency heads for their review.

This request will enable OSC to continue its efforts to reduce its long-standing case processing backlogs. While progress was made in reducing case backlogs in 1999, OSC experienced a nearly 15 percent increase in case intake during 2000, hampering its efforts to produce demonstrable reductions in the overall backlog. OSC anticipates making significant progress in 2002 to reduce backlogs and provide customers with prompt and timely service in accordance with the time frames laid out in 5 U.S.C. § 1214(b)(2)(A)(ii) (240 days to process prohibited personnel practice complaints) and 5 U.S.C. § 1213(b) (15 days to make an initial determination on a whistleblower disclosure).

OSC significantly revised its Strategic Plan this year, including the associated annual performance plan. The plans place more emphasis on prioritizing cases by category and resource allocation, while improving quality. Highlights of the FY 2002 annual performance plan include: (1) creating measurable quality standards for assessing OSC investigations and legal analyses; (2) devising a formal system of case handling and resource allocation according to complexity and type of case; (3) developing a system to eliminate any unnecessary steps in case-handling; (4) creating specific performance goals for the Hatch Act and Disclosure Units; (5) enhancing goals for OSC's outreach and education program; and (6) maintaining OSC's human resource and information technology programs.

Note.—Authority to borrow is available to the Panama Canal Commission on a permanent indefinite basis. This authority is limited only in that the amount of borrowing outstanding at any time cannot exceed \$100 million.

The Panama Canal Act of 1979 established the Panama Canal Commission to operate and maintain the interoceanic waterway. Pursuant to Public Law 104-106, the Commission is a wholly-owned government corporation and is funded by a revolving fund. In accordance with the Panama Canal Treaty, the United States transferred ownership of the Canal to the Republic of Panama on December 31, 1999. Fiscal year 2000 data in the following tables cover first quarter operations and transfer-related obligations, including severance pay and accumulated leave. Fiscal year 2002 expenses are for the settlement of remaining accident and contract claims against the Commission.

² Represents a \$70,880,000 current year estimate and a —\$6,444,000 reconciliation adjustment.

The Administration proposes to reverse the misleading budget practice of using advance appropriations simply to avoid spending limitations. Accordingly, the amount requested to be appropriated for 2002 is sufficient to provide normal funding and no advance appropriation for 2003 is requested. In order to avoid overstating discretionary budget authority and outlays in 2002, language is proposed to designate the advance appropriation budget authority and outlays amounts as direct spending.

Pursuant to Public Law 93–328, the 2002 appropriation request of the U.S. Postal Service for Payment to the Postal Service Fund is \$76,729,000. This amount includes: \$56,303,000 requested for free mail for the blind and overseas voting; —\$8,684,000 as a reconciliation adjustment for 1999 actual mail volume of free mail for the blind and overseas voting; \$29,000,000 for prior years' liability under the Revenue Forgone Reform Act of 1993; and \$110,000 to restore funds for prior years' liability under the Revenue Forgone Reform Act of 1993 rescinded by P.L. 106–113. In addition to these funds, \$67,093,000 (an advance appropriation from 2001 for the 2001 costs and the 1998 reconciliation adjustment for free mail for the blind and overseas voting) will become available to the U.S. Postal Service in 2002.

The Postal Reorganization Act of 1970, Public Law 91–375, converted the Post Office Department into the U.S. Postal Service, an independent establishment within the executive branch. The Postal Service commenced operations July 1, 1971. This agency is charged with providing patrons with reliable mail service at reasonable rates and fees.

The U.S. Postal Service is governed by an 11-member Board of Governors, including 9 Governors appointed by the President, a Postmaster General who is selected by the Governors, and a Deputy Postmaster General who is selected by the Governors and the Postmaster General.

Decisions on changes in domestic rates of postage and fees for postal services are recommended to the Governors of the Postal Service by the independent Postal Rate Commission after a hearing on the record under the Administrative Procedure Act. The Commission also recommends decisions on changes in the domestic mail classification schedule to the Governors. Decisions of the Governors on rates of postage, fees for postal services, and mail classification are final, subject to judicial review.

Effective in 1986, the Postal Service Fund (Fund) was included in the congressional and executive budget process and taken into account in making calculations under the Balanced Budget and Emergency Deficit Control Act of 1985 (Gramm-Rudman-Hollings). The Omnibus Budget Reconciliation Act of 1989 amended title 39 of the U.S. Code by adding a new section, 2009a, which provides that, beginning in 1990, the receipts and disbursements of the Fund shall not be considered as part of the congressional and executive budget process and shall not be taken into account in making calculations under Gramm-Rudman-Hollings.

Programs.—Included are all postal activities providing window services; processing, delivery, and transportation of mail; research and development; administration of postal field activities; and associated expenses of providing facilities and financing.

The rapid development of electronic messaging systems promises to increase the effectiveness of the Nation's communications infrastructure and United States competitiveness in the future. As the provider of a universally available hard copy delivery system, the United States Postal Service is encouraged to examine these emerging communications technologies and to cooperate with the private sector on issues of integration, directory service, and strategic alliances that will facilitate the development of secure and reliable electronic messaging networks.

The transition from hard copy to electronic messaging already has begun. The Postal Service should assist in developing future messaging systems. The Postal Service's participation should recognize the changing needs of its business,

governmental, and individual customers; should focus on determining an appropriate means for public and private sector cooperation; and should be consistent with the agency's vision of evolving into a premier provider of 21st century postal communications. The Postal Service should seek to leverage its comprehensive delivery, messaging security, and addressing directory management capabilities in a manner that promotes universal access to the benefits of these new technologies for all citizens who desire them.

Financing.—The activities of the U.S. Postal Service are financed from the following sources: (1) mail and services revenue; (2) reimbursements from Federal and non-Federal sources; (3) proceeds from borrowing; (4) interest from U.S. securities and other investments; and (5) appropriations by the Congress. All receipts and deposits are made to the Postal Service Fund and are available without fiscal year limitation for payment of all expenses incurred, retirement of obligations, investment in capital assets, and investment in obligations and securities.

Separate legislation also increased the Postal Service's statutory borrowing authority beginning in 1991. Section 2005 of title 39, United States Code, as amended, increased the Postal Service's borrowing authority by \$2.5 billion in 1991 for a revised ceiling of \$12.5 billion and an additional \$2.5 billion in 1992 for a revised total ceiling of \$15 billion. The total net increase in amounts outstanding in any one fiscal year were also increased and now may not exceed \$2.0 billion in obligations issued for the purpose of capital improvements and \$1.0 billion for the purpose of paying operating expenses. As of September 30, 2002, it is expected that the total debt instruments issued and outstanding pursuant to this authority will amount to \$15.0 billion.

Operating.—Estimated revenue will total approximately \$68 billion in 2002. This includes \$67.9 billion from mail and services revenue, \$27 million from investment income, and \$48 million for revenue foregone appropriations in 2002. Total expenses are estimated at approximately \$71 billion in 2002.

The Postal Reorganization Act of 1970 established the Postal Service as a fully self-sufficient, independent entity. Postal revenues were to cover the full costs of postal operations. When the Act was passed, the Postal Service received substantial taxpayer subsidies, both appropriated and unappropriated. Consistent with the intent of the 1970 Act, Congress has taken steps over time to reduce these subsidies. Under the 1974 Civil Service Retirement Fund—Postal Employee Benefits Act, the Postal Service assumed responsibility for paying unfunded retirement costs from wage schedule increases under postal labor contracts. These costs are not covered by normal employee/employer contributions to the retirement fund. The 1985 Reconciliation Act shifted responsibility for paying health benefit costs of Postal annuitants retiring after 1986 from OPM to the Postal Service. The 1987 Reconciliation Act had the Postal Service make one-time payments to defray annuitant health benefit costs in 1988 and 1989 and retirement COLA costs in 1988. (Retirement COLAs, like wage schedule increases, result in retirement liabilities not covered by normal retirement fund contributions.) Under the 1989 Reconciliation Act, the Postal Service assumed responsibility for paying health benefits of survivors of post-86 annuitants and unfunded retirement COLA liabilities for post-86 annuitants.

The Omnibus Budget Reconciliation Act of 1990 superseded certain existing legislation and expanded the Postal Service's responsibility for benefit costs of postal annuitants. Effective October 1, 1990, the Postal Service is required to fund Civil Service Retirement System (CSRS) COLAs and the employer's share of Federal Employees Health Benefits Program

(FEHBP) premiums for postal annuitants who retired after June 30, 1971, and their survivors. In addition, the Postal Service is required to fund the retroactive CSRS COLA and FEHBP premium costs for which the Postal Service would have been liable if the provisions of this new legislation had been in effect as of July 1, 1971.

Under the Omnibus Reconciliation Act of 1993, the Postal Service was required to make certain payments for past COLAs and health benefits, over and above any other payments required by law, of \$693 million to the Civil Service Retirement and Disability Fund, and \$348 million to the Employees Health Benefits Fund. These two payments were made in three equal annual installments, beginning in fiscal year 1996.

The Balanced Budget Act of 1997 repealed the authorization for transitional appropriations to the Postal Service which had funded the liabilities of the former Post Office Department to the Employees' Compensation Fund. Effective October 1, 1997, these liabilities became liabilities of the Postal Service payable out of the Postal Service Fund.

The Presidio Trust is a wholly owned government corporation established by the Omnibus Parks and Public Lands Management Act of 1996 (Public Law 104-333) to manage, improve, maintain and lease property in the Presidio of San Francisco. After this former military base was transferred to the National Park Service (NPS), the Trust was created to take over responsibility for managing the hundreds of houses, office buildings, and other facilities in an innovative manner that uses private-sector resources, but is consistent with surrounding NPS lands. This appropriation funds the operation and capital improvements of the Trust.

Monthly benefit amounts are calculated from a base of \$23, adding \$4 for every year of service over 25, up to a maximum monthly benefit of \$43. Employers finance benefits on a pay-as-you-go basis by a cents-per-hour tax, currently established at 26 cents per hour.

All railroad retirees receive the equivalent of a social security benefit, and they may also receive other add-ons including rail industry pension payments, windfall payments, and supplemental annuities. Social security benefits for former railroad employees are funded by the social security trust funds, and rail industry pension payments are the responsibility of the rail sector.

Under current law, a financial interchange occurs once each year between the social security trust funds and the social security equivalent benefit (SSEB) account. The SSEB receives monthly advances from the general fund equal to an estimate of the transfer the SSEB would have received for the previous month if the financial interchange transfers were on a monthly basis. Advances from the previous year are repaid annually to the general fund immediately after the financial interchange is received. In 2000, \$3,005 million was advanced and \$2,972 million was repaid.

The Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989 established the Resolution Trust Corporation (RTC) as a temporary agency to dispose of insolvent thrift institutions. The Savings Association Insurance Fund took over responsibility for resolving failed thrifts on July 1, 1995, and the RTC's assets and liabilities were transferred to the FSLIC Resolution Fund on December 31, 1995.

Of \$18.3 billion appropriated to RTC in 1994 by the RTC Completion Act, the Thrift Depositor Protection Oversight Board determined that only \$4.6 billion was required and the excess was returned to Treasury on December 31, 1997. When the RTC terminated, the Oversight Board's primary function ceased. On October 29, 1998, the Board was abolished and its remaining responsibility to oversee the Resolution Funding Corporation (REFCORP), which provided financing for the RTC, was transferred to the Secretary of the Treasury.

The primary mission of the Securities and Exchange Commission (the Commission) is to administer and enforce the Federal securities laws in order to protect investors, and to maintain fair, honest, and efficient markets.

Full disclosure.—This program ensures that investors will be provided with material information in the public offering, trading, voting and tendering of securities. Standards of financial reporting are established and enforced to enhance the transparency, relevance, and reliability of financial reporting so that financial statements used by investors in making investment decisions are presented fairly and have credibility. Issuers that have conducted public offerings, have securities traded in the public markets, or have total assets and security holder populations of specified sizes, are required to furnish management, financial, and business information to investors and the Commission on a continuing basis in proxy materials and in annual and other periodic reports. The staff reviews these documents on a selected basis for compliance with the disclosure requirements. In addition, all registration statements of issuers that are making their initial public offerings of securities and all third party tender offer filings are reviewed by the staff. As a result of the review process, the staff may issue comments to issuers to elicit better compliance or, where appropriate, refer matters for enforcement action.

Electronic filing (EDGAR).—The Commission's EDGAR system provides the agency with the capability for electronic receipt, analysis, and dissemination of virtually all of its full disclosure filings. Since becoming operational in 1993, EDGAR has received and successfully processed over 3.9 million documents submitted in approximately 1.5 million separate submissions from over 28,000 companies and funds registered with the SEC.

In order to take advantage of changes in technology and respond to the demands of filers and investors, the SEC awarded a three year contract for EDGAR modernization on July 1, 1998. This multi-year modernization effort will improve the presentation quality and data structure of SEC filings.

The first major modernization milestone, a newly privatized dissemination subsystem, was delivered on time and within budget on November 1, 1998. This modernized dissemination subsystem is now faster, more reliable, and has resulted in a further reduction of subscriber costs from \$79,000 to \$44,571 per year, a savings of approximately \$233,000 when compared to the cost prior to privatization.

The second major milestone, the inclusion of Hypertext Mark-up Language (HTML) and unofficial PDF filings, was delivered on time and within budget on May 24, 1999. The third milestone, allowing filings over the Internet, was delivered in May 2000, on-schedule and within budget. The Legacy system will be operational until September 30, 2001.

Prevention and suppression of fraud.—This program investigates and prosecutes violations of the federal securities laws, including financial fraud, illegal distribution of unregistered securities, fraudulent offerings, insider trading, market manipulation, and illegal conduct by broker-dealers and investment advisers. Enforcement actions include emergency actions halting ongoing violations, injunctions against future violations, and disgorgement orders. Financial penalties and bars from acting in a regulated capacity may also be obtained. Over \$2.8 billion in disgorgement and penalties has been collected in our actions since 1984. Because of the critical importance of criminal prosecutions as a deterrent to securities fraud, we refer cases to criminal authorities and detail staff to assist in criminal prosecutions.

Supervision and regulation of securities markets.—Trading in the securities markets is regulated to protect investors against fraud and manipulation and to ensure the maintenance of fair, orderly, efficient, and competitive markets. The Commission oversees the work of self-regulatory organizations, monitors securities markets and broker-dealer operations, and develops regulatory strategies for coping with market stress, promoting compliance, and meeting changing domestic and international conditions. The Commission also conducts examinations of broker-dealers and inspections of transfer agents, clearing agencies, and self-regulatory organizations.

Investment management regulation.—This program administers the Investment Company Act of 1940 and the Investment Advisers Act of 1940. Mutual funds and other investment companies manage over \$7.6 trillion for more than 50 million households. The staff reviews disclosure documents filed by investment companies and investment advisers and regulates and inspects investment companies and investment

advisers to protect investors against fraud, self-dealing, inadequate disclosure, and other abuse. The staff refers serious violations for enforcement action. This program also is responsible for administering the Public Utility Holding Company Act of 1935.

Legal and economic services.—This program provides a range of legal services and economic analyses to the Commission concerning its law enforcement, regulatory, and legislative activities, including: (i) prosecution of enforcement actions in appellate courts; (ii) representation of the Commission in all other appellate litigation, in private litigation where the Commission appears as *amicus curiae*, and in corporate reorganizations; (iii) representation of the Commission in actions brought against the Commission and its employees; (iv) preparation of Congressional testimony and comments and advice concerning proposed securities legislation; (v) advice to the Commission concerning issues arising from its law enforcement and regulatory activities; (vi) preparation of draft opinions of adjudicatory decisions and advice to the Commission regarding its adjudicatory decisions; (vii) advice to the Commission regarding compliance with Government-wide statutes and the statutes and rules applicable to the agency's activities; and (viii) economic analyses of proposed regulations and legislation, litigation support in enforcement cases, and independent studies of issues affecting the securities markets. In addition, the administrative law judges conduct hearings and issue initial decisions in formal administrative proceedings where the Commission has determined that hearings are appropriate in the public interest and for the protection of public investors.

Program direction.—This program assists the Commission in fulfilling its statutory requirements and in responding to changes in the securities industry by carefully evaluating priorities, formulating and implementing policies, and managing agency resources. The staff provides management direction and analysis, internal control, financial management, personnel management, data processing, public affairs, records management, information dissemination, general administrative services, and processing of equal employment opportunity complaints.

The Commission continues to follow the fee reduction schedule established in the "National Securities Markets Improvement Act of 1996" (P.L. 104-290). Title IV of this law amends fee language found in Section 6(b) of the Securities Act of 1933 and Section 31 of the Securities and Exchange Act of 1934. Under this law, the Section 6(b) fee rate paid by corporations to register securities with the Commission was reduced from \$264 per \$1,000,000 of the aggregate price of securities offered in 2000 to \$250 per \$1,000,000 in 2001, and will be further reduced in 2002 to \$238 per \$1,000,000 of the offering amount. The first \$200 per \$1,000,000 of this fee shall be deposited in the general fund of the U.S. Treas-

ury, and the remaining increment will be made available for use by the Commission. In addition, to promote equity across securities markets, the "National Securities Markets Improvement Act of 1996" extended Section 31 transaction fees to the over-the-counter market at a rate of 1/300 of one percent of the aggregate dollar amount of securities transacted, the rate currently paid by all national and regional exchanges. These transaction fees are also made available for use by the Commission.

The Commission received approval from the Office of Management and Budget (OMB) and the Office of Personnel Management (OPM) to implement special pay rates for certain accountants, attorneys, and examiners in 2001. These special rates were designed to help ameliorate the continued difficulties the Commission has had in attracting and retaining sufficient numbers of qualified staff and the Commission will monitor their effectiveness throughout 2002. The Commission will work with OMB to determine whether additional steps should be taken with respect to Commission salaries.

The Tennessee Valley Authority (TVA) was created in 1933 as a Government-owned corporation for the unified development of a river basin comprised of parts of seven States. The President's Budget proposes that the agency's program in 2002 be financed primarily from proceeds available from current power operations and borrowings against future power revenues.

The following tables provide detailed information on programs financed by power proceeds and borrowings and programs financed by appropriations and nonpower proceeds.

TVA's nonpower programs.—As a Federal corporation, TVA serves national interests by operating infrastructure services for the production of electricity, economic development and the stewardship of natural resources in 201 counties in seven States.

Prior to 2000, appropriations provided for public services to maintain and operate public resources—navigable channels, flood control, recreation, and non-regulatory, community-based programs that protect the water quality of the Tennessee River system. Federal appropriations do not support TVA's power program. The Budget proposes that in 2002, these services be funded entirely by TVA's power revenues, user fees and sources other than appropriations.

TVA has a statutory obligation to operate 54 dams and reservoirs to regulate stream-flow for the multi-purpose objectives of navigation, flood control, recreation and aquatic habitat conservation; perform cyclic maintenance and repair of

14 navigation locks, maintain dam machinery and spillway gates; perform channel, lock and mooring modifications to maintain safety and passability for increasingly larger cargo vessels; conserve and improve water quality and supply in 12 watersheds and dam tailwaters for fisheries and potable supply for 4 million people; control mosquitoes and plant pests; prevent shoreline erosion and manage residential development in riparian zones; plan for and manage 550,000 hectares (1.4 million acres) of land; provide services and education to watershed communities; operate public recreation areas; and, meet Federal regulatory law requirements.

TVA's Power Program.—TVA's role as the sole supplier of electric power to an area of 80,000 square miles in the seven Tennessee Valley States is being reviewed as the Nation considers ways to restructure the electric power industry. Income from power operations, net of interest charges and depreciation, and other operating expenses is estimated at \$100,000,000 in 2002. Power generating facilities are financed from power proceeds and borrowings. The Budget reflects specific cost-cutting measures the agency is taking to implement its 10-Year Business plan and improve its ability to supply power at competitive prices.

Financing.—Amounts estimated to become available in 2002 are to be derived from power revenues and receipts of \$7,209,000,000.

Operating results and financial conditions.—Payments to the Treasury from power proceeds in 2002 are estimated at \$52,000,000–\$32,000,000 as a dividend (return on the appropriation investment in the power program) and \$20,000,000 as a reduction in the appropriation investment in the power program. Outstanding borrowings for the power program are expected to decrease by \$208,000,000 during 2002.

Total assets are estimated to decrease by \$241,000,000 during 2002 as depreciation of existing assets exceeds expenditures for new assets. The estimate of liabilities at September 30, 2002, is \$280,000,000 less than the estimate at September 30, 2001. Total Government equity at September 30, 2002, is estimated to be \$39,000,000 greater than that at September 2001. This change includes the net income from power operations, less payments to the Treasury.

The 1992 Benefit Plan was established by the Coal Industry Retiree Health Benefit Act of 1992. It pays for health care of those miners who retired between July 21, 1992 and September 30, 1994, and their dependents, who are eligible for benefits under an employer plan and cease to be covered, usually because an employer is out of business. Plan trustees are appointed by the United Mine Workers of America and the Bituminous Coal Operators Association, a coal industry bargaining group. The Plan is supported by signers of the 1988 labor agreement with the United Mine Workers of America.
